Errata to
C. Groth, K.-J. Koch, and T. M. Steger

When economic growth is less than exponential

In Section 3, page 220, under case 2: “$g_c = n/(1 - \varphi)$” should read “$g_c = \sigma n/[(1 - \alpha)(1 - \varphi)]$”.

In Section 5.1, page 230:
Equation (38): after the second equal sign, a $\beta$ is lacking in the denominator which should be “$(1 - \alpha + \alpha \theta)\beta n + [1 - \alpha(1 + \beta)] \rho$”.
Immediately after equation (41): “$v^* < z^*$, which immediately follows by comparing (40) and (39)” should read “$v^* > 0$, which follows from (37) and (33)”.

Line 2 from below: “capital-output ratio” should read “output-capital ratio”.

These corrections do not change the scientific message of the article.
