Education

MSc programme in Economics - elective course

BSc programme in Economics - prioritized elective at the 3-year

The course is part of the Financial line at the MSc programme in Economics, symbolized by 'F'.

Tilvalgsuddannelsen i Erhvervsøkonomi - valgfag på KA delen

MSc programme in mathematics-economics

Content

This is the Economics programme's central course on Finance, giving a broad insight into the core matter of the field. Building on earlier relevant courses from the Bachelor's programme in Economics, it provides the common ground for later elective Finance courses.

The course develops your understanding of the different asset classes in financial markets, including bonds, stocks, forwards, futures and options. Based on considerations of investor demand, standard asset pricing methods are introduced. The pricing methodology is used to analyse the choice of investment projects inside firms, including the management of real options. Turning to classic corporate finance issues, the course explores the optimal capital structure of the firm, its optimal dividend policy, risk management, and the incentives of the firm's management.

The asset pricing models include the Capital Asset Pricing Model (CAPM), the Arbitrage Pricing Theory (APT), risk-neutral pricing, and the Black-Scholes formula. Excel is used to solve problems in these areas. Market efficiency and investor behaviour is discussed.

Learning Outcome

After completing the course, the student should be able to:

Knowledge:

- Understand, account for, define and identify the main methodologies, concepts and topics in Finance
- Solve standard problems in Finance, partly using Excel
- Criticize and discuss the main models in Finance, relating them to current issues in financial markets and corporate finance

Skills:

- Manage the main topics and models in Finance
- Organize material and analyze given problems, assessing standard models and results
- Argue about financial topics, putting results into perspective drawing on the relevant knowledge of the field

Competencies:

- Bring into play the achieved knowledge and skills on new formal problems, and on given descriptions of situations in financial markets or corporations
- Be prepared for more advanced models and topics in Finance

Literature

The main textbook for the course:

Jonathan Berk and Peter DeMarzo: Corporate Finance, Third Edition, Global Edition, Pearson. <http://catalogue.pearsoned.co.uk/catalog/academic/product?ISBN=9780273792024>.

Some supplementary shorter texts and current media clippings are supplied through Absalon.

Lecturers

Autumn 2016:

Lecture: See Course responsables

Teachers of exercise classes:

Ex. Class 1: Mikala Louise Sørensen

Ex. Class 2: Cancelled

Ex. Class 3: Bjarke Tornager

Ex. Class 4: Hjörtur Pall Hjartar

Ex. Class 5: Patrick Schnipper

It is not decided, how many exercise classes will be created and in what language they will be taught. Exercise class 1 and 2 are planned to be taught in English. So the amount and the schedule of the estimated pre-planned exercise classes can be changed up to the start of the semester.

16E-;Hold 5;;Corporate Finance and Incentives (undervisning)

Tid og sted

Semesteret starter den 1. september/1. februar. Hvis din undervisningsdag er en mandag, så starter undervisningen den første mandag i måneden.

Skemaerne ser ud som nedenfor. Lokalet står med en forkortelse og et lokalenummer – f.eks CSS 35.01.05. CSS står for "Center for Sundhed og Samfund" – altså det gamle Kommunehospital, tallet 2 refererer til bygning nr. 2, det næste tal er etagen og det sidste tal er lokalenummeret.

Der kan være både forelæsninger og klasseundervisning i et givent fag. Hvis du skal have flere fag, skal du huske at tjekke skemaerne og se om der er overlap i undervisningstiderne. Husk at angive i ansøgningskemaet hvilken klasse, du ønsker at følge.
